TREE MORTALITY

Financial Assistance – Landowner Cost-Share Programs

NRCS Environmental Quality Incentives Program (EQIP) <u>Tree Mortality / Forestry Program</u>

- Parcel Size Eligibility: 3-acre minimum; 4 dead trees/acre
- Funding Percentage: apx. 50% cost share
- Work Covered:
 - o won't cover work in defensible space zone
 - dead tree removal
 - thinning of understory and existing trees, mastication
 - o reforestation
- <u>Timeline:</u> Next round of applications due November
 - o funding would start in January
- <u>Funding Availability:</u> \$5 million available statewide, but will be competing with southern counties who have experienced more tree mortality thus far
- For more information, see EQIP website: http://www.nrcs.usda.gov/wps/portal/nrcs/main/national/programs/financial/eqip/

CALFIRE CA Forestry Incentives Program (CFIP)

- Parcel Size Eligibility: 20-acre project minimum (can combine four 5-acre neighboring parcels)
- Funding Percentage: 75-90% cost share
- Work Covered:
 - o won't cover work in defensible space zone
 - RPF writing forest management plan
 - forest health practices, but can potentially include non-merchantable dead tree removal
 - thinning of understory and existing trees
 - reforestation
- <u>Timeline</u>: Applications accepted and funded on an ongoing basis
 - once application is submitted, it takes about two weeks to get a completed contract. Then, RPF must complete management plan and environmental reviews before work can begin. This often takes at least a month or two, depending on RPF availability
- <u>Funding Availability:</u> plenty available
- For more information, see CFIP website:
